

Reclaiming Michigan's Throwaway Kids Electronic Appendix¹

Because of space considerations and expense, much of the data received in response to ACLU of Michigan Freedom of Information Act (FOIA) requests was not included in the report "Reclaiming Michigan's Throwaway Kids." However, the ACLU of Michigan is pleased to make this information available on this website. Data was supplied by 41 different school districts. The information provided by all of the districts was in some way helpful to efforts to understand and analyze the issues that are the subject of the report, but not all of the information provided by the districts has been illustrated with charts and graphs displayed on this site. This is because in some cases, details regarding the racial identities of suspended students were not available. In other cases, the data provided was insufficient to analyze a district's circumstances properly. Finally, there are a few remaining districts for which analyses are pending, and such will be posted at the time of their completion.

Appended data concerns only school districts specified, and the data cannot be used to draw definitive conclusions about all school districts in the State. Although the ACLU of Michigan has made all reasonable efforts to ensure accuracy in the counting of reported suspensions and in the calculation of proportional discipline along racial lines, as in all cases there is the possibility of human error. However, because of precautions taken, any inaccuracies are likely to be minor and unlikely to have significantly affected the overall trends reflected by appended tables and charts.

In addition, the figures that are the basis for statistical calculations were supplied by the school districts themselves, and consequently, the ACLU of Michigan cannot warrant the accuracy of the numbers provided. The district data consists only of secondary school data. Elementary schools in each district are not included in the analyses unless otherwise noted.

The following abbreviations appear in charts that are used to illustrate statistics.

Abbreviations Key

W – White

B – Black

H – Hispanic

AS – Asian

AK – Alaska Native

AI – American Indian

MR – Mixed Race

STS – Short-term suspension

LTS- Long-term suspension

EXP – Expulsion

OSS – Out of School Suspension

SB – Student Body

¹ A special thank you is extended to Stephanie Burrue, a law student and former ACLU of Michigan intern, who dedicated countless hours to reviewing data and preparing charts and graphs for this appendix.

Methodology for Creation of Charts

The methods used to create the charts posted at this website are described below:

“Suspension/Expulsion Rates” and “Suspension/Expulsions by Race”: Charts labeled in this way illustrate the percentage of students affected by disciplinary measures relative to either the entire student body or the racial sub-group of students to which they belong.

- (a) Charts that reflect a suspension/expulsion rate for all students in the school district illustrate a calculation that is made by dividing the total number of suspensions or expulsions by the total enrollment. An expulsion rate may not be available for every district.
- (b) Charts that reflect a suspension/expulsion rate for a specific racial/ethnic group illustrate a calculation that is made by dividing the number of suspensions or expulsions of members of the racial or ethnic group by the total number of students in that group who are enrolled as students in the school district.
- (c) Depending upon how a school district reported suspensions, the suspension rate may be the rate of out-of-school suspensions (“OSS”), short-term suspensions (“STS”), or long-term suspensions (“LTS”).
- (d) The suspension rate may be calculated by using the total number of suspension incidents, or the number of students suspended, depending upon how the school district reported their data.

“Racial Disparities” or “Share of Suspensions”: Charts labeled in this way illustrate the percentage of all suspensions in a school district that have been received by members of a specific racial group, along with a comparison of that percentage with the percentage of the overall student body that students in that group represent. For example, a chart may indicate that white students constituted 80 % of a school district’s student population and received 60% of all of the suspensions dispensed during a particular school year.

- (a) The percentage of a particular racial/ethnic group within a school district is calculated by dividing the total number of students within that group by the school district’s total student enrollment.
- (b) A particular racial/ethnic group’s share of suspensions or expulsions is calculated by dividing the total number of suspensions received by students within that group by the total number of suspensions or expulsions given to all students in the school district.

(The number of suspensions used for these calculations have been provided by the school districts in response to FOIA requests. Enrollment data has been obtained from the Center for Educational Performance and Information (CEPI).)

There is no uniform method used by school districts to identify and report student’s racial and ethnic identities. We acknowledge that individual students may self-identify differently from

how a school district identifies and categorizes them. However, our methodology relies solely upon the data that school districts and CEPI have provided.

Allen Park

Allen Park Public Schools produced data on those suspensions and long-term suspensions/expulsions for which there were disciplinary hearings during the 2006-2007 academic year. The district did not specify the length of reported suspensions. Enrollment data was obtained from the CEPI website.

Suspension Rates (SR) by Race (2006-2007)

School	Total Enrollment	Suspension Rate (SR) for All Students	SR for Black Students	SR for White Students	SR for Hispanic Students	SR for AS Students	SR for AI/AK Students

Between the 2004-2005 and 2006-2007 school years there were 2,891 out-of-school suspensions. The District reported forty-one different incidents that resulted in out of school suspensions (OSS). Fighting was the number one basis for OSS, followed by disruptive conduct and insubordination/open defiance.

District Incidents Resulting in OSS (2004-2007)

Center Line Public Schools

Center Line Public Schools produced data on suspensions and expulsions as well as disciplinary hearings for the period 2004-2007. Suspension information was disaggregated by student, incident and number of occurrences, school, length of suspension, and race/ethnicity. Data concerning disciplinary hearings was disaggregated by school, date of incident and date of hearing, race/ethnicity, type of incident, and disposition of the hearing. Enrollment data was collected from the CEPI website.

There were several instances in which black students were given harsher punishments than white students who committed the same offense. For example, in the 2006-2007 academic year, a black student committed an assault on 9/1/2006 and received a 180 day suspension, with a recommendation for alternative education programs. Another black student committed an assault on 3/26/2007 and was suspended for the remainder of the school year. Summer school was recommended, and work was still provided for core classes. Yet, a white student who committed an assault on 11/21/2006 was only suspended until 12/4/2006 (about two weeks) and he was allowed to come in for exams from 11/28/06-11/30/06.

From 2005-2007, there were three assaults on teachers, staff members, or district employees. On 5/3/07, a black student assaulted a district employee and was initially suspended for the remainder of the school year, with a recommendation for expulsion. Expulsion occurred in July. In 2005-2006, a black student committed an assault on a staff member on 4/28/06 and was suspended for the remainder of the school year. However, on 1/23/06, a white student who committed an assault on a teacher was only suspended for the remainder of the 4th marking period, and the suspension was served by working with children and the principal at Miller Elementary. While these examples appear to show that black students in Center Line Public

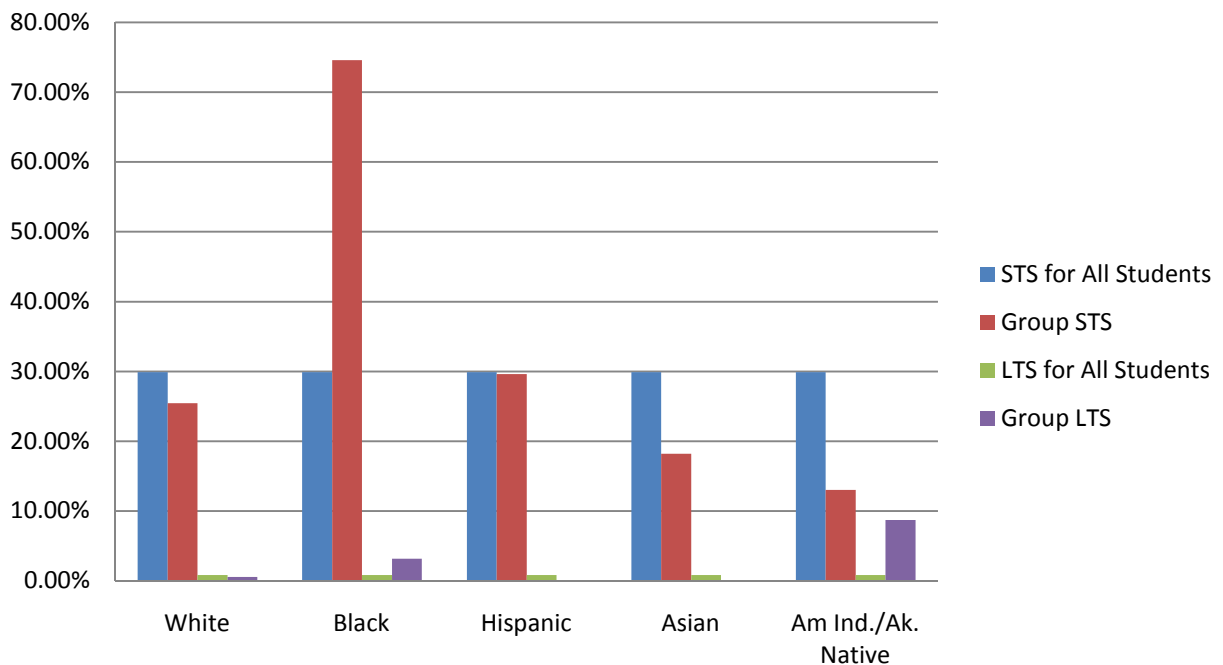

Schools receive a disproportionate share of punishment as well as harsher discipline than white students, the individual backgrounds of students and/or previous behavioral issues were not provided, and there may be other factors that account for the apparent disparities. No definitive conclusions regarding disparate treatment can be drawn from this data.

CHIPPEWA VALLEY

Chippewa Valley Schools produced data intended for evaluation of the impact of zero tolerance laws. Suspension information was disaggregated by building, students, incidents, race/ethnicity, and reasons for suspension/expulsion. However, the reasons for suspension/expulsion did not disaggregate race/ethnicity, only total incidents and students. Data provided for expulsion hearings was disaggregated by building, grade, race/ethnicity, gender, whether an attorney or lay advocate was present, date of the hearing, date of the offense, and the type of incident. Enrollment data was collected from Chippewa Valley Schools rather than CEPI.

The Chippewa Valley board office records expulsions once they are recommended by the high school. The high school keeps no record of expulsions.

*The school district did not specifically classify these categories as zero tolerance incidents, but under Chippewa Valley Schools policies and MI statute, they arguably fit the zero tolerance category. There may also be other categories that the District includes under ZT not listed.

** We also cannot distinguish if a verbal assault was committed against a District employee, volunteer, or contractor to fall under ZT, or if it was only committed against a student

Share of ZT Suspensions

Zero tolerance policies also have an overall impact on student suspensions and expulsions. However, the impact of zero tolerance on minority students in Chippewa Valley Schools could not be calculated (because the reasons for suspensions/expulsions were not disaggregated by race/ethnicity). Of all incidents resulting in suspension, incidents that can be classified as zero tolerance constituted 7.82%. Students who were suspended for reasons that can be placed in the zero tolerance category constituted 12.03% of all the students suspended from Chippewa Valley Schools. Of the many categories that fall under zero tolerance, “gross misbehavior” was the basis for the greatest number of suspensions. Charts are found below.

Crestwood School District

The Crestwood School District reported “Middle East” as an ethnicity in its data; however, CEPI enrollment data does not report “Middle East” as an ethnic group. Thus, enrollment data for Middle Eastern students could not be gathered or formulated in the analysis. Data on short-term suspensions at Riverside Middle School included both in-school and out-of-school suspensions.

Ferndale

Ferndale Public Schools produced suspension and expulsion data, but did not specify racial and ethnic identities; length of suspensions; and the number of school disciplinary hearings. Information was provided about only one student who appealed a disciplinary hearing decision. Appeals to the Ferndale Board of Education are for the limited purpose of reviewing due process issues. The Board upheld the long-term suspension of the student, finding no violation of student due process. Enrollment data was obtained from the CEPI website.

Fitzgerald Public Schools

Fitzgerald Public Schools disaggregated data on suspensions and expulsions by occurrences, school, discipline code, race/ethnicity, and the total number of days suspended. However, the length of individual suspensions could not be determined because the data did not disaggregate by individual students. No racial/ethnic information was provided for expulsions. Enrollment data was collected from the CEPI website.

Flint

Flint Community Schools produced data on suspensions and expulsions. The data provided for expulsions was disaggregated by student, school, grade, date of incident, date of expulsions, race/ethnicity, and discipline charge (except for the 2005-2006 academic year which did not include racial/ethnic data). Enrollment data was collected from the CEPI website.

In 2006-2007, Flint's Community School's had an average suspension rate of 159.86% for its secondary schools and a suspension rate of 91.16% district wide. The suspension rates for Black students were above the averages for the secondary schools and the district at 166.38% and 101.79%. If suspensions were evenly distributed, every black student in Flint Community Schools could expect to be disciplined with a suspension at least once, with more than half of black students at the secondary level being punished with a suspension more than once. For Hispanic students, the suspension rate at the secondary level was 47.86% and 32.30% district wide. Grades 7 and 8 had the highest suspension rates, while grade 12 had the lowest.

Lansing School District

The Lansing School District produced data on suspensions and disciplinary referrals. Enrollment data was obtained from the CEPI website. The district also provided percentages along with the suspension data, but they are not included in the charts below because information about how they were calculated was not provided. Percentages in the charts have been calculated with enrollment totals obtained from CEPI and the data provided by the school district.

Data regarding referrals indicate that referrals were generally unsuccessful in deterring suspensions, but that nearly all students who were suspended in the 1999-2000 school year received a referral.

Romulus

Romulus Community Schools produced data on suspensions and disciplinary hearings for the period 2005-2008. Enrollment data was collected from the CEPI website. Because the numbers provided by the district were combined totals for three academic years, the enrollment data collected through CEPI for three academic years was likewise combined to maintain a constant variable as to time frame.

Enrollment 2005/06- 2007/08	White/ Caucasian	African American/Black African	Hispanic	American Indian/ Native American	Asian	Mixed Race/ Multi Ethnic	Middle Eastern	Total

Disciplinary Hearings

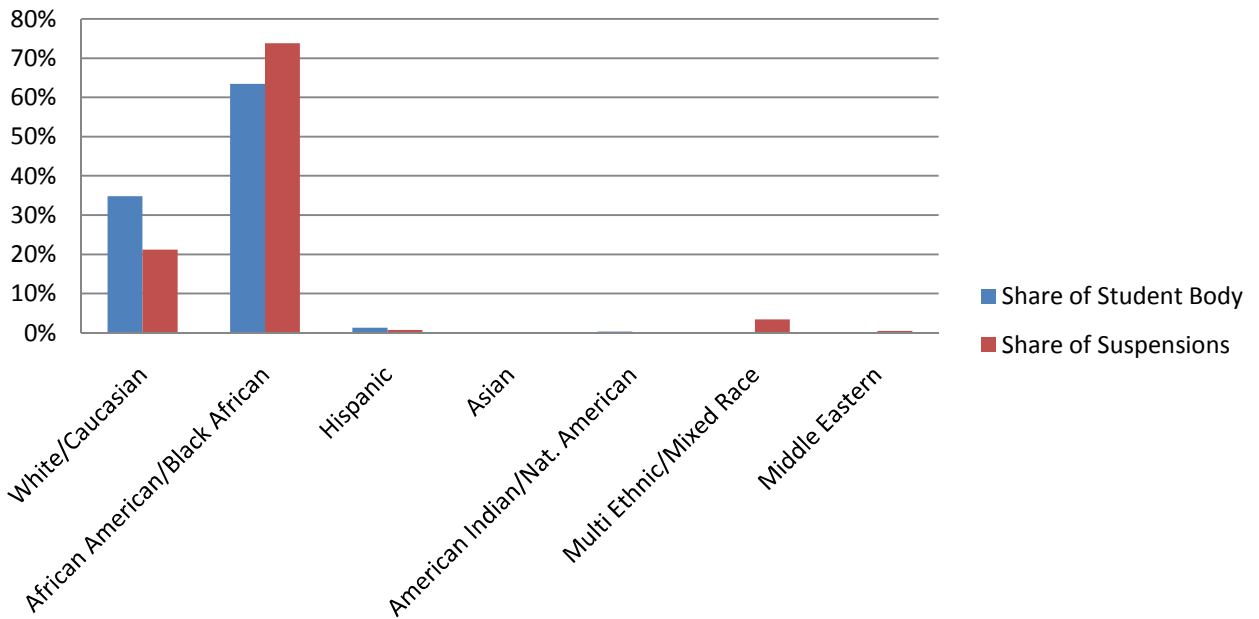

In 2005/06 there were 25 disciplinary hearings, 20 hearings in 2006/07, and 24 hearings in 2007/08. The primary violations were for weapons, assault, and drugs (marijuana). However, in 2007/08 nine of the students expelled or suspended were determined to be special education students and one disposition was pending per a special education re-evaluation. The dispositions of these student indicated home-based special education.

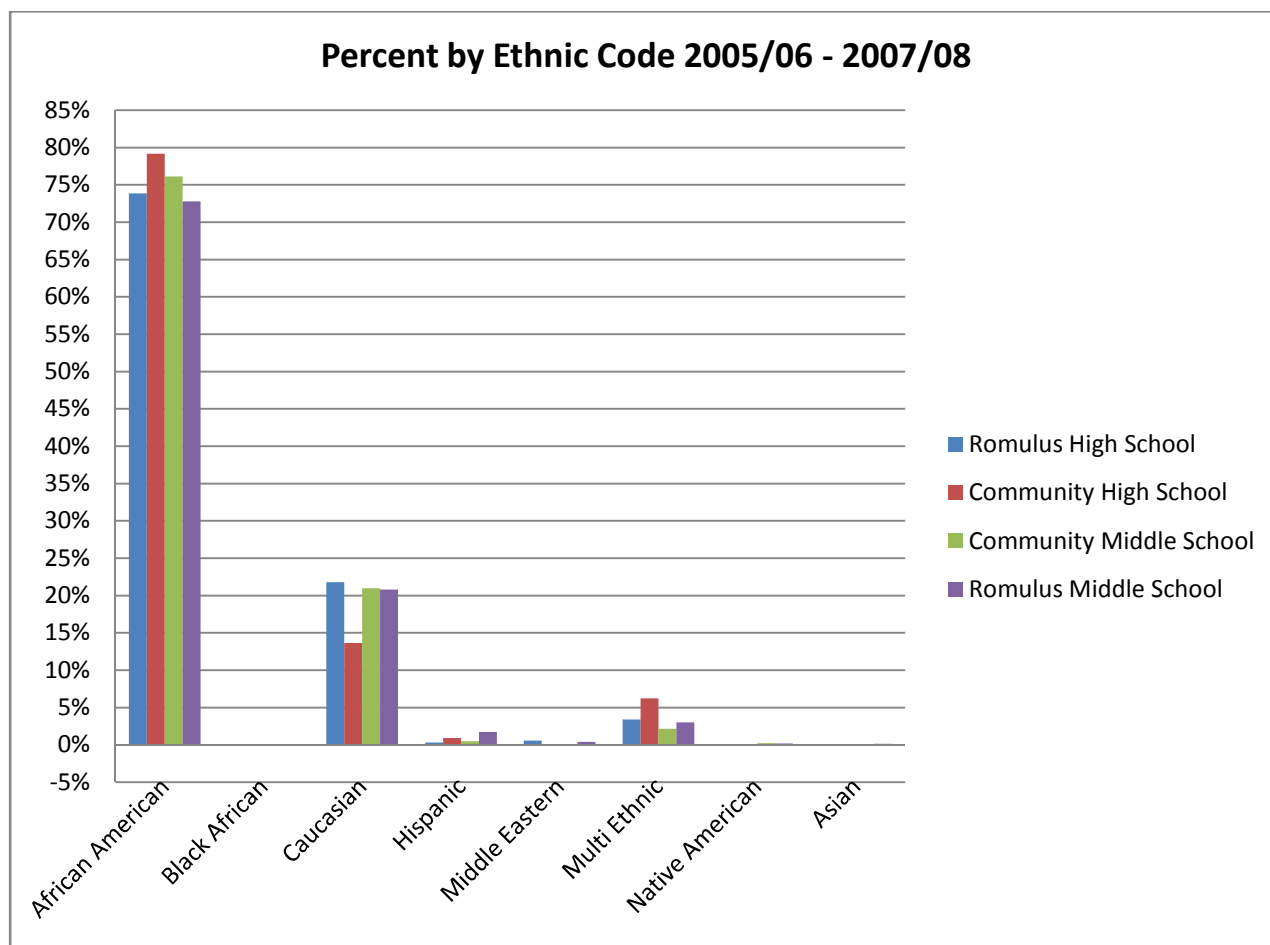

* Percent by Ethnic Code as calculated by the district, the methodology for calculation is unknown.

During the 06-07 year, one black student was suspended for a semester for a false fire alarm/bomb threat. Another white student was given community service for the same offense, and not suspended. Insufficient information is available about these students and incidents to draw conclusions regarding disparate treatment.

Troy

Troy School District provided data for the period 2004 to 2007. Suspension data was disaggregated by student, discipline building, incident date, ethnicity, grade, description of the incident, type of suspension (in school or out of school), and the number of days. Enrollment data was obtained from the CEPI website.

Walled Lake Consolidated Schools

Walled Lake Consolidated Schools produced data on suspensions and disciplinary referrals. However, the District did not identify the agencies to which students were referred. The term “other intervention” which appears in the district’s reports is not defined. Enrollment data was collected from the CEPI website.

Warren Woods

Warren Woods Public Schools produced disciplinary information for grades 6-12. The district also provided minutes from two Board meetings during which a student was expelled from school. Data concerning multiple/mixed race or ethnicity students could not be analyzed because the district records the multiple race/ethnicity category along with students who reported no racial/ethnic response (the category reads “multiple or no response”).
